Instructions for Completing the 3-Day Voiding Diary

February 12, 2014. Prompted voiding has been shown in research to be an effective means of control and management of urinary incontinence (UI) in older patients. This therapeutic model involves prompts by the caregiver to consistently timed visits to the restroom (for instance, once every 2 hours). As opposed to timed voiding, in which the patient regulates his or her own schedule, prompted voiding is most often applied in settings such as long-term care, where patients have impaired ...
