## **The Truth About Sex Differences | Psychology Today**

Most of us have been raised with pretty simplistic ideas about sex and gender.

Namely, that there are two sexes, male and female, and that they align with two genders, man and woman.

## **Psychology Today**

Gender refers to the cultural differences expected (by society / culture) of men and women according to their sex. A person's sex does not change from birth, but their gender can. In the past people tend to have very clear ideas about what was appropriate to each sex and anyone behaving differently was

## **Biological Theories of Gender | Simply Psychology**

By contrast, the term gender describes psychological (gender identity) and sociological (gender role) representations of biological sex. At an early age, we begin learning cultural norms for what is considered masculine and feminine. For example,
