Amazon.com: Realtime Web Apps: With HTML5 WebSocket, PHP ...

HTML5 apps are quite possibly the future of the web. Instead of relying on local desktop applications for tasks such as calendar management, code generation or photograph editing, HTML5 allows for developers to create applications that run within the browser. These HTML5 web apps have a variety of possible functionality, and it's not even fully known what the possibilities for HTML5 apps are.

Building real-time web apps with HTML5 WebSockets ...

This article first appeared in issue 217 of .net magazine - the world's best-selling magazine for web designers and developers.. WebSockets are a part of the HTML5 specification, and the simplest way of looking at them is that they set a standard for creating long-running bi-directional connections between a browser and a server. With this connection in place, browsers can send messages back ...
