Understanding Risk and Reward in Investing

The risk/reward ratio helps investors manage their risk of losing money on trades. Even if a trader has some profitable trades, he will lose money over time if his win rate is below 50%. The...

Risk/Reward Ratio Definition - Investopedia

The risk/reward ratio is used to assess the profit potential (reward) of a trade relative to its potential loss (risk). Both the risk and reward of a trade must be defined by the trader. 1 Risk is determined using a stop-loss order, where the risk is the price difference between the entry point of the trade and the stop-loss order.

Reduced risk assessment scope to justify less testing is not rewarded. Computer System Assurance (CSA) - Risk and Reward CSA addresses some CSV costs, but there is a cost of failure for doing too little.

Computer System Assurance (CSA) - Risk and Reward

The reward to risk ratio is used by traders to compare the expected returns of a trade relative to the amount of risk required to earn those returns. The relationship between these two numbers can tell a trader if the potential reward outweighs the potential risks on a certain trade which can help qualify or disqualify the trade idea.
