Scania 4 Series Engine

The Scania 4-series, is a truck model range which was introduced by Scania in 1995. It was the successor of the 3-series and it came in five engine combinations, three cabs and four chassis types. The 4-series was succeeded by the PRT-range in Europe in 2004, but production continued in Brazil until 2007.

Scania 4-series - Wikipedia

When Scania presented the successor to the 4-series, the inclined engine was dropped, so the L94 was superseded by the K-series. Scania L94IA. The L94IA (L94IA6x2/2NB) was an articulated normal-floor intercity bus chassis and was only available in Latin America. Scania L94IB. The L94IB was the

Scania 4-series (bus) - Wikipedia

In marketing of the 4-series, Scania have generally only used the engine position (F/K/L/N), the engine displacement (9/11/12) and the series number (4), which is why we know them as F94, F114, K94, K114, K124, L94 and N94. The 4-series was superseded in 2006 by the new Euro IV compliant bus and coach range consisting of the K-series, N-series ...

Scania 4-series (bus) — Wikipedia Republished // WIKI 2

The 4-series was the successor of the 3-series and was offered in five engine combinations and four chassis types. Production of Scania 4-series was stopped after its successors P-series, R-series and T-series were introduced in 2004.. The engine sizes are - as usual for the 1-4 series - shown in the model name with a number constructed by the cylinder volume in litres followed
