Orrell analyses Western scientific culture's quest for order and links it to an essentially religious conception of beauty."—Margaret Wertheim, author of *Pythagoras Trousers and Physics on the Fringe* (Margaret Wertheim 2012-06-29)
"If science is the search for truth, we'd better understand what is this truth that we seek.

Truth or Beauty: Science and the Quest for Order: Orrell ...

Science and the Quest for Reality is an interdisciplinary anthology that situates contemporary science within its complex philosophical, historical, and sociological contexts. The anthology is divided between, firstly, characterizing science as an intellectual activity and, secondly, defining its social role.

Critically analyzing this project is James Davison Hunter and Paul Nedelisky, both scholars at the University of Virginia, in their book, *Science and the Good: The Tragic Quest for the Foundations of Morality*. Hunter and Nedelisky provide a solid description of that quest, but their assessment of it as tragic goes too far.

revealed to them.

The Quest for Truth: Science and Religion in the Best of ...

Triumphant science was not prepared to admit any doubts or to share the stage with anyone else. Philosophy, and more generally, what came to be called in the nineteenth century the humanities, fell in public esteem and retreated to a defensive stance. Unable to deny science's capacity to explain the physical world, they abandoned that domain entirely.

I. Wallerstein, "Social Science and the Quest for a ...

An introduction to the new area of ignorance studies that examines how science produces ignorance—both actively and passively, intentionally and unintentionally. We may think of science as our foremost producer of knowledge, but for the past decade, science has also been studied as an important source of ignorance. The historian of science
