Sharples AS16V vertical centrifuge with a maximum G force of 8,435, bowl rpm speed of 12,000 and a bowl capacity 5.1 liter. Applies centrifugal force to a liquid when fluids enter rotating bowl.

Sharples AS16V Vertical Centrifuge Demonstration - YouTube

The Super centrifuge is a vertical high speed tubular bowl centrifuge, generating centrifugal force up to 20000 times the force of gravity. It is used either for continuous separation of two immiscible liquids having different specific gravities or for batch-wise clarification / polishing of liquids containing fine insoluble solids.

machine for applying centrifugal force to a liquid. The rotor, called a bowl, has an opening in the bottom to allow the liquid to enter, and openings in the top of the bowl to allow the fluid or fluids to discharge. The fluid entering the rotating bowl is caused to rotate with the bowl.

Sharples Super Centrifuges - Separation Equipment Sales, Inc.

The superiority of Sharples, Pennwalt and Tomoe Super-D-Canter is determined by the following factors. Super-D-Canter operates on the centrifugal sedimentation process. The high sedimentation efficiency and torque capability enables the Super-D-Canter to absorb feed variations more effectively than other types of centrifuge or separation equipment.
