Unsustainable Transport: City Transport in the New Century ...

Sustainable transport refers to the broad subject of transport that is sustainable in the senses of social, environmental and climate impacts. Components for evaluating sustainability include the particular vehicles used for road, water or air transport; the source of energy; and the infrastructure used to accommodate the transport (roads, railways, airways, waterways, canals and terminals).

Unsustainable Transport: City Transport in the New Century ...

Measures to promote transport sustainability have their limits. Indeed, the built environment, transport infrastructures, and even modes cannot change quickly enough to solve the bulk of the problems related to unsustainable transport. Most of the investment that is already in place will remain so for 50 years or more.
