Who Built That Bridges An

All major bridges are built with the public's money. Therefore, bridge design that best serves the public interest has a threefold goal: to be as efficient, as economical, and as elegant as is safely possible. Efficiency is a scientific principle that puts a value on reducing materials while increasing performance.

bridge | History, Design, Types, Parts, & Facts | Britannica

Chinese built big bridges of wooden construction, and later stone bridges, and the oldest surviving stone bridge in China is the Zhaozhou Bridge built around 605 AD during the Sui Dynasty. This bridge is also historically significant as it is the world's oldest open- stone segmental arch bridge.
