Working Memory Women And Work

Working Women Show Sharper Memory With Age WEDNESDAY, Nov. 4, 2020 -- Women who work outside the home may end up with a sharper memory later in life, a new study suggests.

Researchers found that among nearly 6,200 U.S. women aged 55 and older, those who'd worked for pay in young adulthood and middle-age were less prone to memory decline, versus those who'd stayed out of the labor force.

Research Team Finds That Working Women May Have Slower ...

Participating in the workforce helps divert their attention. They also interact with more people in the workforce and this helps in maintaining their mental stability. This might be just one of the reasons why women who work tend to be at the safer side when it comes to memory loss." says Madhumita Srivastava, a Kanpur based psychologist.
