up the body's muscular system. There are over 650 muscles in the human body. They are under our skin and cover our bones.

Biology for Kids: Muscular System

Human muscle system, the muscles of the human body that work the skeletal system, that are under voluntary control, and that are concerned with movement, posture, and balance. Broadly considered, human muscle--like the muscles of all vertebrates--is often divided into striated muscle, smooth muscle, and cardiac muscle.

human muscle system | Functions, Diagram, & Facts | Britannica

The muscular system consists of more than 600 muscles, and these muscles work together to enable the functioning of the body. The muscular system contains three types of muscles.

Give a detailed explanation of how the muscular system works.

Your leg won't bend to kick the soccer ball unless you want it to. These muscles help to make up the musculoskeletal (say: mus-kyuh-low-SKEL-uh-tul) system — the combination of your muscles and your skeleton, or bones. Together, the skeletal muscles work with your bones to give your body power and strength.

Your Muscles (for Kids) - Nemours KidsHealth

These are your voluntary (VOL-uhn-ter-ee) muscles, which means you can control their movements. They are also called skeletal (SKEL-i-tl) muscles, because they attach to your bones and work together with your bones to help you walk, run, pick up things, play an instrument, throw a baseball, kick a soccer ball, push a lawnmower, or ride a bicycle.

Healthy Muscles Matter: Ways to Care for the Muscular System
